# Julio

Julio's mother is a single mom. Before his surgery, she lived in fear for her son; Julio's life was at risk due to feeding difficulties, lung problems, & other health issues.

After Julio's surgery, she felt pure joy, saying that she now feels "confident & full of hope."

# Thaisa

Thaisa's mother, Egly, was 6 months pregnant when she found out her daughter would be born with a cleft lip.

Egly was very worried about feeding her daughter properly & caring for her. Thanks to Hospital Virgen de la Puerta & their neonatology department, Egly found out about the comprehensive cleft care services offered by GSF.

"We want to thank GSF & EsSalud from the bottom of our hearts for their work. Thanks to GSF, our daughter will be even more beautiful & will be able to lead a normal life."
